

About us:

befree is a globally trusted provider of accounting and finance offshoring solutions. We blend industry expertise with technology and automation to deliver customised, scalable support for businesses worldwide.

Headquartered in Gandhinagar, with clients across Australia, the UK, the US, we help practices and businesses enhance efficiency, productivity, and continuity through skilled and certified professionals delivering world-class services. Our delivery centres across 10 cities in India serve as the backbone of our global service delivery network.

Role: AI Implementation & Digital Transformation Associate

We are seeking a high-ownership professional to drive AI implementation and digital transformation initiatives across the organization.

This role requires a strong blend of structured thinking, execution capability, and business understanding. You will work with multiple departments to identify improvement opportunities, convert them into actionable initiatives, and drive implementation with clear visibility and measurable impact.

This is not a purely technical role. It is a strategic execution role requiring independent thinking and problem-solving ability.

Job Responsibilities:

- Engage with cross-functional teams to understand processes and identify improvement opportunities
- Translate business challenges into structured AI/data-driven initiatives
- Support feasibility analysis and structured execution planning
- Drive implementation of transformation initiatives with clear timelines and stakeholder alignment
- Track progress, risks, and outcomes with structured reporting
- Ensure initiatives are aligned with business priorities and deliver measurable impact
- Represent the function in cross-department meetings when required

Qualification & Work Experience:

- 2-4 years of experience in Digital Transformation, Program Management, Analytics, Consulting, or similar roles
- Strong project management and stakeholder coordination skills
- Working understanding of AI and data analytics concepts
- Ability to break down ambiguous problems into structured execution plans
- Strong documentation and communication skills
- Comfortable working across functions and managing multiple priorities

Technical Skills:

- High ownership mindset
- Structured and analytical thinker
- Brings solutions, not just problems
- Comfortable challenging ideas constructively
- Detail-oriented and disciplined in execution
- Ability to work in evolving and dynamic environments

Job Location, Work Timings and Work Model:

- Gandhinagar
- 7:30am to 4:30pm
- Full Time

Success in This Role:

You will succeed if you are able to:

- Convert ideas into structured initiatives
- Improve cross-functional alignment and execution clarity
- Deliver measurable improvements through AI and digital initiatives
- Build visibility and governance around ongoing transformation efforts
